

III. Specification Amendments

(Please add, as a new page after page 21:)

Abstract of the Disclosure

Embodiments of the present invention generally relate to novel multivalent vaccines and methods of vaccinating. In an embodiment, the present invention is a trivalent vaccine for canine herpesvirus (CHV), canine rotavirus (CRV), and Minute virus of canine (MVC) or other canine parvovirus delivered to pups of a whelp through colostrums and providing sufficient antibody titer to impart protection.
